Material Safety Data Sheet

RESPONSIBLE CARE[®]
OUR COMMITMENT TO SUSTAINABILITY

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Identification

Product Name: Tetrapotassium Pyrophosphate Anhydrous (TKPP)
Reference Number: AST10058
Date: June 20, 2013

Use of substance or preparation

Food ingredient, coating ingredient.

Company/Undertaking Identification

ICL PERFORMANCE PRODUCTS LP
622 Emerson Road - Suite 500
St. Louis, Missouri 63141

Emergency telephone: In USA call CHEMTREC: 1 800 424 9300
In Canada call CANUTEC: 1 613 996 6666

Outside the USA, including ships at sea, call CHEMTREC's
international and maritime telephone number (collect calls
accepted): +1 (703) 527-3887

General Information: +1 800 244 6169 (Worldwide)

2. HAZARDS IDENTIFICATION

Classification of the substance/preparation

GHS

Warning

H319 - Causes serious eye irritation.

Prevention:

P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response:

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337+P313 If eye irritation persists: Get medical advice/attention.

3. COMPOSITION/INFORMATION ON INGREDIENTS

<u>Substance</u>	<u>CAS No.</u>	<u>% w/w</u>	<u>EINECS No</u>
Tetrapotassium Pyrophosphate	7320-34-5	97 +	230-785-7

4. FIRST AID MEASURES

General

Treatment is systematic and supportive. This product may cause eye, skin, and respiratory tract irritation. May cause gastrointestinal irritation with nausea, vomiting and diarrhea. No significant adverse effects are expected to develop if small amounts are swallowed. Inhalation of this dust may cause coughing and sneezing.

Eye Contact

Immediately flush the eyes with plenty of water. Seek medical attention if needed. This dry powder may cause foreign body irritation in some individuals.

Skin contact

Remove this material from skin with plenty of soap and water. Prolonged contact with dry powder may cause drying or chapping of the skin.

Inhalation

Inhalation of the dust may cause coughing and sneezing. Remove to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

Ingestion

Do NOT induce vomiting. If conscious and alert, give plenty of water to drink. Never give anything by mouth to an unconscious person. No significant health effects are expected if small amounts (less than a mouthful) are swallowed.

5. FIRE FIGHTING MEASURES

Extinguishing media

Non-combustible. No special requirement. To extinguish fire use water spray, dry chemical, carbon dioxide, or appropriate foam.

Unsuitable extinguishable media

Non-combustible. No special requirement.

Exposure hazards

No special considerations.

Protective equipment

As a general precaution, firefighters and others exposed, wear self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions

Avoid unnecessary exposure and remove all material from eyes, skin and clothing.

Environmental precautions

Small quantities: Avoid discharge into the environment

Large quantities: Avoid discharge into the environment

Method for cleaning up

Sweep, scoop or vacuum spill material, contaminated soil and other contaminated material and place in clean, dry containers for removal. If possible, complete cleanup on a dry basis. Residual material can be flushed with water.

7. HANDLING AND STORAGE

Handling:

Handle in accordance with good industrial hygiene and safety practices. Use good industrial practice to avoid eye contact. Wear protective gloves and wash hands immediately after handling. Remove material from clothing. Avoid breathing dust.

Engineering measures

Ensure adequate ventilation to keep dust concentrations below occupational exposure limit.

Storage

Store in cool, dry place to maintain product performance. Product is hygroscopic and should be stored in a dry area.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure limit

ACGIH TLV 10 mg/m³ (inhalable) 8-hr TWA, 3 mg/m³ (respirable) 8-hr TWA
OSHA PEL 15 mg/m³ (total dust) 8-hr TWA, 5 mg/m³ (respirable) 8-hr TWA

OSHA and ACGIH have not established specific exposure limits for this material. However, OSHA and ACGIH have established limits for particulates not otherwise regulated (PNOR) and particulates not otherwise classified (PNOC) which are the least stringent exposure limits applicable to dusts.

Respiratory protection

Avoid breathing dust. In case of insufficient ventilation, use approved respiratory protective equipment as described in U.S. OSHA 29 CFR 1910.134 or European Standard EN149.

Hand/Skin protection

Wear protective gloves is recommended; wash hands and contaminated skin thoroughly after handling.

Eye protection

Wear appropriate protective eyeglasses or chemical safety goggles as described in U.S. OSHA 29 CFR 1910.133 or European Standard EN166.

9. PHYSICAL AND CHEMICAL PROPERTIES

General Information

Chemical Formula:

K₄P₂O₇

Form:

Granules or powder

ICL Performance Products LP Material Safety Data Sheet

Material: Tetrapotassium Pyrophosphate Anhydrous

Reference No.: AST10058

Page 4 of 6

June 20, 2013

Color: White
Odor: Odorless

Important health, safety and environmental information

pH: 10.2 - 10.7 (as a 1% solution)
Solubility in Water: 187g/100 g. H₂O (@ 25 °C)
Bulk Density 0.96 – 1.2 g/cc

Other Information

Melting point: begins to melt incongruently at 641.5 °C, completely melted at 1,109 °C

Flash point : not available

Lower and upper explosion limits (UEL/LEL): not available

These physical data are typical values based on material tested but may vary from sample to sample. Typical values should not be construed as a guaranteed analysis of any specific lot or as specifications for the product.

10. STABILITY AND REACTIVITY

Product is stable under normal conditions of storage and handling. Store in a cool, dry place to maintain product performance.

Conditions to avoid

Incompatibles – store away from moisture

Materials to avoid

Strong oxidizing agents, moisture, ammonia, magnesium, sodium, and calcium. Solutions of this product are corrosive to aluminum.

Hazardous decomposition

Oxides of phosphorus.

11. TOXICOLOGICAL INFORMATION

Laboratory data

Data from ICL Performance Products LP single-dose (acute) animal studies with this material are given below:

Oral - rat LD₅₀: > 2980 mg/kg; slightly toxic
Dermal - rabbit LD₅₀: > 7940 mg/kg; practically nontoxic
Eye Irritation - rabbit: 43.6/110.0; moderately irritating
Skin Irritation - rabbit: 1/8.0 (24-hr exposure); slightly irritating

The dry material may cause foreign body irritation in some individuals. Prolonged contact with the dry material may cause drying or chapping of the skin. Excessive inhalation of dust may be annoying and can mechanically impede respiration.

Following repeated exposure (13-weeks) to this product in their food, kidney damage with changes in body weight, food consumption, clinical parameters and organ weights were reported at high-dose levels in rats.

This material has been defined as a hazardous chemical under the criteria of the U.S. OSHA Hazard Communication Standard (29 CFR 1910.1200).

12. ECOLOGICAL INFORMATION

Environmental toxicity

The following data have been classified using the criteria adopted by the European Economic Community (EEC) for aquatic organism toxicity

48-hr EC₅₀ Daphnia magna: > 100 mg/l, Practically Nontoxic
96-hr LC₅₀ Mysid Shrimp : > 100 mg/l, Practically Nontoxic
96-hr LC₅₀ Rainbow trout: > 100 mg/l, Practically Nontoxic

Environmental fate

This product is considered to have low toxicity to aquatic and estuarine species. Inorganic phosphates, including this product, at high concentrations in the environment have the potential to cause eutrophication in aquatic systems. This condition is characterized by excessive algal growth, and subsequent decreases in oxygen levels. In general, proper use and disposal of this product should pose no adverse ecological risk.

Inorganic compounds in contact with the soil, sub-surface or surface waters may be taken up by plants and utilized as essential nutrients. Phosphates may also form precipitates, usually with calcium or magnesium. The resultant compounds are insoluble in water and become a part of the soil or sediment. The term biodegradability, as such, is not applicable to inorganic compounds.

13. DISPOSAL CONSIDERATIONS**European waste catalog number**

16 03 03 inorganic wastes containing dangerous substances

Disposal considerations

This material when discarded is not a hazardous waste as that term is defined by the U.S. Resource, Conservation and Recovery Act (RCRA), 40 CFR 261. Dry material may be land filled or recycled in accordance with local, state and federal regulations. Consult your attorney or appropriate regulatory officials for information on such disposal.

14. TRANSPORT INFORMATION

The data provided in this section is for information only. Please apply the appropriate regulations to properly classify your shipment for transportation.

Road/Rail, Sea and Air

IMDG/UN	Not classified
ICAO/IATA	Not classified
RID/ADR	Unknown
Canadian TDG	Not classified
U.S. DOT	Not classified

15. REGULATORY INFORMATION**Former EU classification**

Xi Irritant
R 36 Irritating to eyes.

Additional information

WHMIS Classification Not Controlled

SARA Hazard Notification

Hazard Categories Under Title III Rules (40 CFR 370): Immediate, Delayed

Section 302 Extremely Hazardous Substances: None

Section 313 Toxic Chemical(s): None

CERCLA Reportable Quantity: Not applicable

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulation and the MSDS contains all the information required by the Canadian Controlled Products Regulation.

Refer to Section 11 for OSHA Hazardous Chemical(s) and Section 13 for RCRA classification.

16. OTHER INFORMATION

	<u>Health</u>	<u>Fire</u>	<u>Reactivity</u>	<u>Additional Information</u>
Suggested NFPA Rating	1	0	0	
Suggested HMIS Rating	1	0	0	E E = safety glasses, gloves, and dust respirator

Reason for revision: Section 11. Supersedes MSDS dated: September 7, 2011

Drafted in accordance with ECC Dir 2001/58/EC
